Digital Champions Program

Enrol for the Digital Champions Program and be a part of the Digital India Movement

Our world is rapidly changing and many aspects of our lives have become 'digital'. Business models across industries have changed almost overnight through innovative applications of digital technologies. In this 'new normal', business leaders are evaluating traditional strategies and operating models from a fresh 'digital' lens. In this scenario, it is important to provide the current generation of students with the right set of skills and make them ready for the challenges of the future. Towards that end, Reliance Jio has designed a one-of-its-kind learning program - Digital Champions.

Program Details

'Digital Champions' is a 5-week **Action Oriented Program** that requires students to interact closely with multiple Small and Medium Businesses (SMBs) to get insights into their business and challenges. The student will also learn about new digital technologies and how they can positively impact SMBs. Guidance on new age problem solving methodology will be provided through a digital toolkit and students can in turn apply this learning in real world business challenges.

Eligible Students

- For 4 year undergraduate courses, students who have completed 1st or 2nd year
- For 3 year undergraduate courses, students who have completed 1st year

Selection Criteria

- Student selection would be done on the basis of their responses to an online assessment test

We are eager to engage with you and are looking for students who are passionate about bringing a change to our country by being a 'Digital Champion'.

Come, join the Digital India Movement!

Note: Please note that we have limited openings in each location and students would be given preference on “first come first serve” basis.
